# Wireframes and Descriptions

This is the main landing page of the app. It displays the list of all saved movie entries using a recycler view. Each item shows the movie title in bold and the category beneath it. In the bottom right corner there is a floating action button with a plus icon tapping this navigates to the add movie page. Tapping an existing entry opens the movie details page for editing or deleting.

This page allows the user to create a new movie entry. At the top there is a text field for enteringthe movie title and below the title field is a dropdown menu for selecting a movie category from the available list of: Comedy, Action & Adventure, Drama, Science Fiction & Fantasy, Horror & Thriller, Other. At the bottom of the page a save button stores the movie in the database and returns the user to the dashboard page. If the title field is left empty the user will be prompted to fill it in.

Interstellar

Science Fiction & Fantasy ⌄

Update

Delete

This page allows the user to update or remove an existing movie entry. It says the movie's current title and category and the user can edit the title and change the category from the dropdown menu. Two buttons are update to save changes and delete to remove the movie from the list. After either action the app returns to the dashboard.
